PROJECTS

Fullscreend.com Live | GitHub

- Built a full stack web app with React and Rails where users log and collect tv shows.
- Connected to the TMDb API to index and search metadata and images of eighty-thousand shows.
- Built modals for CRUD actions with sessions, reviews, and lists to enhance user experience.
- Employed CSS3 flexbox, z-index, and linear-gradients for vivid styling of poster and backdrop images.

Gary's Groovy Gravitating Grains Game Live | GitHub

- Created a "falling sand" game in JavaScript with grains that fall and interact with each other
- Used bitwise operators to translate particles from hexadecimal colors to particle types and vice versa
- Created a dozen, unique elements. Added pause, reset, and default environment features.
